Wood Sculpture from Old Water Mill Gear, China circa 1890

This wood accent piece originally served as a section of gear work from a water mill in China. Note the carved upper section that created the "gearworks."

The deep worn patina of the rich hard wood is warm and inviting. May be used as a unique narrow side table or simply as a stunning organic style sculpture.

Solid, stable and ready for use. All scratches, cracks, dings, or age related separation are reflective of age and use which simply add to the beauty of this unique find.

Please refer to professional photos for clear understanding of color, condition and details; photo lighting, individual monitor display and home lighting may all impact how item is viewed.
